History

The Green Crescent was founded on March 5, 1920 in İstanbul for the purpose of fighting against alcohol and drug addiction to have begun spread after First World War.

Thirty highbrows of the period gave a promise to fight against addiction with a forward looking, which was not seen as a prior danger then but have become perhaps one of the biggest dangers of the future. A promise for healthy and peaceful life. Promise of hope and resolution on fight against addictions.

Prof. In Ordinary. The Green Crescent which was founded by the name of “Hilal- Ahdar” by Mazhar Osman and his friends have been given “public benefit society status” by Council of Ministers Decision.

As the types of addiction have increased since the date of it was founded, new study areas have been added to codes of the Green Crescent and after alcohol, cigarette, drug, gamble and recently technology addiction have been included in arena of it.
Vision, Mission

The Green Crescent, has Europe Quality Management Foundation “3 Star Competence on Excellence”.

Basic Values and Principles

- Fight Against Addictiveness For Human Dignity
- Not To Discriminate
- Independency
- Charity Institution Qualification
- Public Health Qualification
- Scientificness
- Globality
- Sociality
PROJECTS
TBM, Fight Against Addiction in Turkey Training Program

TBM, is a society based global training program model developed by Green Crescent. It is aimed to increase awareness throughout society particularly on children and teenagers regarding various addiction types such as tobacco, alcohol, substance, technology and prevent addiction by informing these target group according to healthy life principles.

With this program realized by Green Crescent together with the Ministry of Education, 11 millions of students and 2 millions of parents have been achieved until now through 28 thousands of school counsellors. TBM, which shall reach to students first and to the whole society later by generalizing through Public Training Centers all through the country, enhances its studies on fight against addiction with corporations.
OBM
Intervention To Addictiveness At School Training Program

Intervention To Addiction At School Training Program (OBM), is a school-based short intervention program addressing to tobacco, alcohol, drug usage on adolescences.

On pilot practice trainings, school counselors have been expressed how to determine status of student, how the teacher recognizes student’s use of substance, how to convince the teenage for treatment, to inform and support family about the issue, determination of intra-family relationships, how the student can be rescued from the risky situation through support of family.

On pilot study process, school counselors have been provided supervisor support by Green Crescent and result assessment have been done. OBM shall become widespread at schools throughout Turkey.
Green Crescent Living Skills Training Program

Green Crescent Living Skills Training Program (YYBE), is a school-based protective, booster training program aiming at decreasing risk factors to cause substance abuse, increase protective factors through life skills.

With YYBE, it is aimed to prevent risks during adolescence period by improvement of life skills and capabilities such as solving problem, overcoming the stress, curiosity, wannabe, proving oneself.
The Green Crescent performing effective activities on each field through a holistic view on fight against addiction, has developed a model including service presentation, financing, human resource, accreditation and inspection of rehabilitation centers with “Turkey Rehabilitation Model”. When the model is made actual, a Turkey-specific addiction rehabilitation system shall be founded.
The Green Crescent has added rehabilitation service to its working area by a code amendment made on 2013. Green Crescent Consultancy Center (YEDAM) was founded on 2015. It began to provide call center service in the first step through 444 79 75 Information Hotline and then established Üsküdar, Cerrahpaşa, Başakşehir service buildings in Istanbul, Eyyübiye service building in Şanlıurfa and Düzce service building. Green Crescent provides free psychological consultation and rehabilitation support to addicted and their acquaintances. Team of YEDAM comprising of specialist psychologists in addiction field, provide information on substance and alcohol addiction to people who call, true guidance, advise and consultancy services.
YEDAM Workshop

YEDAM Workshop, has been designed as a model in accordance with Turkish culture, giving importance to values and prioritizing family. Main purpose is to reintegrate target group to society and provide they have a profession and enable them to spend this period with their families.

The model relocating family, individual and society to its center has been framed by “ahi community” approach having placed in our culture over the centuries. On ahi community tradition meaning to fellowship, the apprentice learns from his/her master not only professional skills and professional ethics, but also to be “good person”. In YEDAM Workshop, the individual shall profess a job during rehabilitation process and begin to get professional training formation which is key basic of ahi community. During this time, the individual shall also have an opportunity to correct and improve his/her behaviors by living within the society. YEDAM Workshop is the step of therapy by profession of YEDAM model which aims at optimal participation of individual into society. In YEDAM Workshop; there are 4 workshops as of gastronomy, sports and hobby, toy and design.
Green Crescent Ambassadors

The Green Crescent has started Green Crescent Ambassadors project to collaborate with all sections of the society. As the first step, occupational groups where children and teenagers predominantly in relation with were determined for the project implemented in İstanbul Bağcılar and Başakşehir. Craftsmen were requested to notify derelict buildings, kennels where alcohol is drunk and idle parks to 153 White Table. It was also requested from Green Crescent Ambassadors to guide individuals and their relatives abusing drug and alcohol to local authorities to get support and to guide the ones demanding to get treatment to YEDAM.

As of 2017, the project implemented through Green Crescent branches in the districts of İstanbul shall be widespread all over Turkey.
The Green Crescent, have implement Improving Business Life (IYI) program to create a healthy working environment and contribute motivation of employees. It is aimed to design training and activity programs for companies and employees within the project, to increase performance and efficiency of employees and to create a healthier and happier workplace profile in the context of informing studies regarding mentally and physically harmful addictions.
Green Detector Mobile Application

Green Detector mobile application is a mobile application aiming at decreasing violation of enterprises and customers violating tobacco products use indoor. Green Detector has been developed to ensure the ban of tobacco products use indoor is respected, to create awareness within society for violations and to protect rights of people who do not use tobacco products and raise their awareness on their legal rights.

This mobile application aiming at decreasing violations of enterprises and customers can be used by downloading to smart phone or tablet. Statements made through choosing location and ground on application are directed to audit system of the Ministry of Health and reaches to area inspection team. Area inspection teams go to ground where there is violation and perform inspections and required proceedings.
Individuals who serve as a model to society by their lives, have a power to effect the youth positively and having fight against addictions all through their lives, and institutions and organizations supporting this fight, are rewarded with Zümrüdüanka Awards by a ceremony organized on Green Crescent week.
A competition of story, poster, comics, composition, discussion and slogan on the subject of “Addiction” is organized by the Green Crescent and İstanbul Provincial Directorate of National Education since 2011 in the context of “Healthy Generation, Healthy Future”.

Competitions have been organized on discussion, story, poster, painting, composition, slogan, caricature fields to ensure primary, middle and high school students are grown in a conscious way against bad habits, to make negative and corruptive effects of cigarette, alcohol, drug and internet addiction are comprehended, to ensure that they have knowledge on activities of Green Crescent. It has been implemented all over Turkey since 2016 through Green Crescent branches.
The competition organized to draw attention of public and particularly the youth on addiction and to make them think on this issue has attracted intensive attention. 510 participants attended to competition with 1225 caricatures from 65 countries, and Ismail Büken from Turkey won the competition.

With International Green Crescent Caricature Competition; it is aimed to draw attention to addiction via humor and its global language caricature, to create awareness and so to ensure that public and particularly the youth consider about addiction and develop reflexes.

Visitors from various countries including USA, Brazil, Mexico, European Countries, Indonesia, China, Australia and Middle East attended the 2. International Green Crescent Caricature Competition in 2018.
ACTIVITIES
13 bin kişi sigaradan öldü

Sigara kanser riskini artırıyor!

Kanser riskini azaltmak için en etkili olanlar:
1. Karışım 
2. Flavonoidler 
3. Klorokresol 
4. Polifenoller 

Dumanı mı?

Kanser riskini azaltma yolları:
1. Dumanın çıkmasını önleme 
2. Yemeklerin dokunulmasını önleme 
3. Dumanın içilebilmesini önleme 
4. Dumanın içilebilmemesini önleme 

Tehlikede olmayız!

Evet
